

Key Knowledge

- Bletchley Park worked closely with the 'Y' service of British wireless intercept stations. The operators here would tune-in to enemy radio messages, in an attempt to gain snippets of information, to send back to Bletchley Park for deciphering.

Bletchley Park and Y Service locations in Britain:

History of computers

Vocabulary

Background noise	A secondary sound that is there but your focus is not fully on it as you focus on another sound.
Byte	A byte is made up of 8 bits. One bit contains a single binary value - 0 or 1.
Computer	Electronic machines that accept and process information to produce an output and then store the results.
CPU	Central Processing Units are the brains of a computer and deal with all of the data it receives from input and output devices, as well as programs ran within the computer.
Memory storage	A portable, compact form of digital storage used to transfer files from one device to another or keep safe.
Mouse	A handheld hardware input device that can move and select text, icons, files and folders on your computer.
Operating system OS	The base software needed on a computer for it to manage basic commands, hardware and software and provide a user-friendly interface.
Radio play	Scripts and written text for broadcasting on air.
RAM	Random access memory. A piece of hardware that allows data to be recalled or stored within a computer.
ROM	Read only memory. Information stored within ROM can only be read and not edited.
Sound effects	Sounds to enhance an event or bring fantasy aspects to life in a film or other media, for example the 'whoosh' of a time machine.
Touch screen	Allows the user to use their finger or multiple-finger gestures to control the device via the screen.
Trackpad	An input device commonly found built into laptops. It is used to move the cursor with the touch of your finger, and some allow for multiple finger gestures.
